PROFILE SUMMARY

Highly skilled full-stack web developer learning Next.js, designing, developing, and deploying highly scalable applications. Passionate about creating seamless user experiences and continuously learning cutting-edge technologies. I want to delve into Web 3.0 and Metaverse technologies to contribute to the evolution of web development, where I can create immersive online experiences.

PROJECTS

E-Commerce Website
https://e-commerce-website-beta-seven.vercel.app/

- This project is built on **Next.js** with **Typescript** and styled with **TailwindCSS** and **React-Hot-Toast** for notification.
- All products data is stored in a **Headless CMS – Sanity** with integrated sanity studio.
- Cart data is managed in **Vercel Postgres Database** and used **React Context API** for state management.
- **Stripe** is used for payment and **Webhooks** to securely creation of orders in database

Learning Management System
https://github.com/saadbutt27/LMS (In Development)

- LMS is a group project for university course **Database Systems**. Built on **Next.js** with **Typescript** and styled with **TailwindCSS** where Teachers & Students can login and access their Profile. Implemented Authentication using **Next-Auth** , **JWT** & **Middleware** for protected routes.
- Students, Teachers and Courses data is managed using **MySQL Database** among 15 tables that are related to each other.
- A student can view courses, upload assignments and perform quizzes in allowed time and update profile.
- A teacher can make quizzes, upload assignments and lectures, marks attendance and update their profiles.

- **Resume Website:** *https://resume-website-ebon.vercel.app/*
- **Sudoku Game:** *https://saadbutt27.github.io/Sudoku/*
- **Panaverse DAO:** *https://panaverse-dao-website-alpha.vercel.app/*
- **Inventory Management:** *https://github.com/saadbutt27/ims*
